ABOUT THE AUTHOR

Dr. George I. Paprikoff (1912-1984) was born in Bulgaria. He graduated from the University of Sofia in 1937 as a Doctor of Medicine, then specialized and worked in surgery. Shortly before the change of political power in 1944, he left Bulgaria and emigrated to Germany.

While living in Germany, after W.W.II, Dr. Paprikoff worked on another dissertation and received in 1947 a second Doctor's Degree in Medicine from the University of Heidelberg.

He emigrated to the United States of America in 1951, where he lived and practiced medicine as a radiologist in Chicago, Illinois.

During his entire life, Dr. Paprikoff took a leading role in political and social organizations and societies. He was active as editor, and his articles were published in numerous periodicals and other publications issued by various emigrant groups.

He was well-known for his interest in literature, philately, numismatics and military science.

For his civic activities and his devotion to the cause of freedom, Dr. Paprikoff received many awards from various organizations and institutions.

Following the tradition of his family, which has given prominent public servants to Bulgaria, through his work and achievements, Dr. Paprikoff made valuable contributions to his native country.

George Paprikoff

PREFACE

The present bibliography, the first of its kind, is a valuable achievement in assembling and recording the writings of Bulgarian emigrants published after the seizure of power by the post-war government of Bulgaria in 1944.

The phrase, "works by Bulgarian emigrants," used here, is to be understood in the meaning of works written by individuals of Bulgarian ethnic origin who left or remained outside the country for whatever reason as well as by those who were born outside the country but have Bulgarian ethnic origin; and this, regardless of their current status with respect to citizenship. The included writings appeared in print and other forms of publication during the period September 9, 1944, to the present and the coverage is worldwide, irrespective of language, topic or subject matter dealt with, or the type of publication.

This remarkable bibliography is the singlehanded achievement of Dr. George I. Paprikoff, a medical doctor by profession and a political activist by conviction, who at the same time demonstrates an extreme devotion and impressive knowledge in the fields of Bulgarian history, literature, military science, philately, and numismatics.

Dr. Paprikoff's present work is a high point in his scholarly achievements and the result of a lifetime endeavor, physical effort, and financial sacrifice in searching, collecting, recording, and organizing the writings by Bulgarian emigrants that have been published since 1944 in an annotated bibliography. No government or institution could claim a similar initiative and accomplishment.

It is indeed a tragedy that Dr. Paprikoff did not live long enough to witness the publication of his contribution to the Bulgarian bibliographic science and literature, but the "Works of Bulgarian Emigrants" will be an everlasting monument to his success.

It is hoped that Dr. Paprikoff's ingenious initiative and the priceless cultural achievement which he left behind will be continued.

Dr. Ivan Sipkov

INTRODUCTION

The bibliography now in print was one of my husband's favorite works. In the last stage of its completion, unfortunately, he left this world unable to witness the final result of his endeavor. What was to be his contribution to the Bulgarian emigrants and to his Fatherland was left for me to complete.

His love for books and the special interest in the activities of his countrymen, who left Bulgaria during the time or after the Communist takeover in 1944, sparked his untiring effort to search for and find every item written and published by Bulgarian emigrants and, if possible, to collect and preserve them.

Dr. Paprikoff loved his native land very much, was proud of his ancestry, and wanted Bulgaria to be represented well in the free world through the Bulgarian emigrants. He deeply appreciated the efforts of every person who could contribute to this project, especially the works that would remain as written documents for future history. He encouraged everyone who was known to have the talent of writing to do so, and often urged some of our former politicians, statesmen and members of their families to write their memoirs.

The work connected with this bibliography was part of his daily activity through four decades (1944-1984) and lasted until the end of his life. Almost every mail included books from various countries in different languages. His greatest enjoyment was to retreat to his library with the new arrivals, to examine, to read, and at the end to include them in the manuscript. Then, the books or copies thereof were assembled and kept in his library for reference. A significant part of my husband's correspondence was related to or in search of publications by Bulgarian emigrants.

His many trips to Europe gave him the opportunity to learn of and obtain more publications through friends, new acquaintances and libraries. His visits to university libraries to browse in their catalogues for academic publications of Bulgarian emigrants hold fond memories for me, as I often assisted my husband in his work, and recall well how happy we both were when we could find new material for his project.

In 1980, the manuscript of the bibliography was ready for publication, but the author again discovered that there were still more works in existence. He wanted his work to be as complete as possible, but, of course, the publication of books never stops and the new items had to be added. So, as the numbers of entries were increasing, the already prepared indexes and page numbers became invalid and it did look as if the work would never end.

At the beginning of 1984, Dr. Paprikoff completed the bibliography but he never ceased to look for new publications. More new books were constantly coming and they still continue to arrive even now that he is gone.

The works listed and described in this bibliography are publications issued in different countries all over the world and, accordingly, in different languages. Some of the authors changed their residences, which explains the different spelling of their names. The name of the author, therefore, sometimes with academic titles, appears in every entry the way it is printed in the book. The title of every item is given in the original language of the publication with an English translation below. The entries are arranged according to the years of publication, and are followed by annotations providing information on the subject and content of the item, since some of the books are difficult, if not impossible, to obtain.

During the time I worked on this bibliography, I had the opportunity and the pleasure to learn to know the various authors as individuals through their works—a very enriching and satisfying experience.

For the realization of this bibliography, my thanks are directed to all the authors, who made their works available to my husband, to the many individuals who helped him in locating additional publications, and to all those, who in one way or another, contributed to the successful completion of this book.

Stanka K. Paprikoff, M.D.
